

## **Binningen Enlighted – Once in a Lifetime Lighting Spectacle for the Basel Region**

On March 16<sup>th</sup>, 2013, several thousand people with torches will create a breathtakingly poetical illumination spectacle in a collective choreography. Together, they will shape figures and create huge movements. With a simultaneously broadcast radio play, the visitors will delve deeply into past and present stories from Binningen. At the same time buildings will be illuminated and the street lighting brought into play. Collectively, the performers will compose „Binningen Enlighted“, a unique light&sound spectacle which is performed as a gigantic social scenography. The event will be filmed from the street-level as well as from a bird's eye perspective and cut in an art film.

„Binningen Enlighted“ has been initiated to celebrate the 50 year jubilee of the Binningen Art Association and developed in cooperation with the Institute of Interior Design and Scenography of the Academy for Art and Design (University of Applied Sciences and Arts Northwestern Switzerland). The event is bound to shine far beyond the regional boundaries.

Protagonists in this exceptional project are the people. Everybody – no matter if they are inhabitants or visitors from near and far – is invited to participate in „Binningen Enlighted“ and to form part of this unique art experience.
